Vol. 22

Chinook, Alberta. Thursday, July 14th 1938

N. O.

WEDDING

DOIG - LARSON

A very pretty wedding was solemnized in the United Church at Youngstown on Wednesday evening July 6th at 6:15 when Gudren Elida Larson, second daughter of Mr. and Mrs. Louis Larson, was united in marriage to Reginald Howard Doig, second son of the late Mr. and Mrs. Walter Clement Doig, Rev. H. A. Whaley officiating.

The bride carried a bouquet of pansies and was given away by her father while Mrs. Chas. Sterling played the wedding march. Mrs. Ainer Anderson, a sister of the bride, was bridesmaid, while the bridegroom was supported by Mr. Ainer Anderson.

After the signing of the register, about twenty of the immediate friends and relatives of the happy young couple gathered at the bride's home south of Youngstown where they partook of a very bountiful wedding breakfast which was served by the bride's mother who was assisted by Mrs. Ainer Anderson.

The many friends of the popular young couple wish them many years of happiness and prosperity.

Mr. Edgar Barry was taken to the Hanna Hospital Tuesday where he will receive medical attention.

Mr. E. H. Targett of Flaxcombe, arrived here Thursday morning, he is the new Chinook C. N. R. Station Agent.

Mr. J. L. Duck left for Kathy on Thursday where he will be relief agent.

Mr. and Mrs. J. Massey and son Roland, of Rainier, arrived last week.

Gordon Wilson left for Turner Valley where he will visit relatives.

Mr. and Mrs. Langley and son Sidney were town visitors Wednesday.

Mr. H. F. Berry returned on Wednesday from Calgary.

Mr. L. Robinson returned from Bowden on Thursday.

Mr. S. M. Brown left on Sunday for Calgary.

Local News

The Chinook United Church service for Sunday, July 17th has been cancelled as Rev. Mr. Whaley will be absent owing to having to attend the annual convention of the United Church.

Mrs. F. Morrell and children accompanied by Mr. Morrell's mother of Oyen, will visit for a time at her son's home.

Mrs. Barros who has been visiting at Bindloss for the past week, returned Sunday accompanied by her son-in-law and daughter with two little daughters. Mrs. Bangs will remain with her parents, Mr. and Mrs. Barros for a few weeks.

Mr. Geo. Aitken was a business visitor at Hanna on Monday.

Messrs. O. D. Harrington, G. Ray Robison and R. Marr were the delegates appointed to attend the U. F. A. convention at Hanna last week.

Mr. E. O. Hocart motored to Calgary on Thursday where he will take in the stampe.

Miss Ruth Robison left on Thursday for Calgary where she expects to be for some time.

Mr. and Miss Proudfoot, of Ontario visited at the home of their brother, Mr. Lorne Proudfoot, this week.

Mr. Mayfield, of Elk Point, who formerly farmed a few miles north of Chinook, returned to this district where he in future will make his home. He did not like the north country as well as Chinook.

Mr. and Mrs. W. A. Todd were Hanna visitors Tuesday.

Southern Fields Damaged by Hail

Lethbridge (CP)—Hail damaged South Alberta crops over the week end. At Monarch, 20 miles west of Lethbridge, hail did 35 per cent damage to 3 600 acres of standing crops, while at Eastend, on the border of Saskatchewan, south of Medicine Hat, hail did 75 per cent damage on a mile-wide stretch several miles long.

Rain fell in several areas during the week end and crop conditions are generally excellent. Most of the wheat is now heading out, making good progress. Absence of hot winds and the frequency of showers are the features of the crop weather map.

Rain fell in the Macleod district yesterday afternoon. Hail cut down some crops east and northeast, wheat that was fully headed out and some oats were badly damaged. Claims as high as 50 per cent are reported.

Wind Damages Crops In Nanton District

Nanton (Special)—Yesterday's strong wind appears to have done damage to the otherwise nearly perfect crop. A survey of the wheat fields shows a large percentage of the grain broken off just above the second joint from the top.

The grain is bent over so that the head is on the ground, and as the straw is kinked there is no hope of it straightening up again. Fields that are heavy appear to have suffered most. Light crops have suffered little damage.

Find Boy Missing Five Days in Bush

Peterborough, Ont. (CP)—A five day search for 17 year-old Elwood Anderson, lost in the dense bush 40 miles northeast of here, ended happily late yesterday when the boy was found 16 miles from home.

The boy was discovered, ragged and emaciated, by a newspaperman and photographer, as he watched three settler's children at play shortly after he had wandered out of the bush. He had eaten nothing but berries since last Thursday.

NOTICE

A Picnic and Sports Day will be held at Cando School Saturday afternoon, July 16th. Every body welcome.

The annual meeting of the Cereal Agricultural Improvement Association will be held in the Cereal Community Hall on Monday, July 18th. All members are urged to be present. Visitors are welcome.

Trees To The Rescue

With the drought now definitely broken over the greater part of the prairie provinces and prospects of a period of more abundant moisture apparently bright, the time appears to have arrived when further consideration might well be given to the advantages of a definite and well co-ordinated program of tree planting throughout sparsely treed and tree denuded areas as a rehabilitation measure.

It is noted, of course, that tree planting is included as one of the items in the rehabilitation program outlined two or three years ago as part of the Prairie Farm Rehabilitation program but to date comparatively little has been heard of this item, attention so far having been mainly centred on the construction of durguts, dams and minor irrigation projects.

Undoubtedly tree planting will follow in many of the districts now being served or about to be served by recently constructed irrigation schemes as a matter of course, but there are still many areas and individual farms which for topographical and other reasons do not lend themselves to watering by feasible irrigation projects, but in these areas, also, there appears to be no reason now why tree planting should not be pushed ahead to the extent that available time and power permits.

A Valuable Aid

That trees, wherever they can be made to serve the purpose can play an important part in farm economics and can be made to go a long way, sometimes even under adverse conditions, towards ensuring sustenance on the farm has been amply demonstrated in many individual cases, as witnessed the following extract from the annual report of the Canadian Forestry Association, dealing with southern Saskatchewan conditions:

"Every district visited furnished striking proof of the possibility of the southern farmer becoming self-sustaining so far as home food supplies are concerned. Had the farm garden been a universal policy instead of being completely overlooked, or at best, in most cases, a haphazard venture, countless millions in food costs during the past nine years could have been avoided. Every farmer can grow his own needs anywhere throughout the south country, and no objective short of this is good enough, and nothing but sound educational progress can achieve it.

"At Piaget, on the main line of the C.P.R., in an area of nine failures of wheat, we visited a man who inside his walls of trees raised all his own needs this year—250 bushels of potatoes, all vegetables, many jars of small fruits, melons and even plums and apples. Every farmer in that area could have done the same had he a few years ago given the need of such things proper consideration."

Can Supply Requirements

Whether or not the Piaget farmer referred to in the foregoing extract had sufficient water available for his garden to take the place of rainfall during years when moisture was not sufficient to raise wheat crops, the Forestry Association's report does not say, but it does at least demonstrate that in years of normal precipitation every farmer in the country could supply his own table requirements practically the year round, provided he has the requisite shelter in the form of trees and hedges.

It is too late, of course, to plant trees this year, but it is not yet too late to prepare soil for a shelter belt to be planted next year, indeed, this advance cultivation and preparation is a requisite to a successful planting. This, as no doubt, most farmers know is stressed by the authorities of the Dominion Forestry farm who supply millions of trees free to farmers throughout the west every spring.

Mortality among man-planted trees in the drought areas of the west has been high during the drought period, but, at the same time, it is surprising how many trees have, with some care and attention, withstood the ravages of a long period of dry weather. They have not made much top growth, it is true, but they have rooted deeper and deeper to reach the dwindling moisture reserves and now these trees are responding again to more copious precipitation.

Opportunity Again Here

The experience of others demonstrates that the mortality of the drought years need not act as a deterrent to the planting of trees on the farm. On the contrary it goes to show that, even during a dry period, they are of immense benefit and with the drought now presumably broken it should afford every encouragement to the individual farmer to take active steps to provide at least for some of his needs in future years, by establishing a good shelter belt at the first opportunity his circumstances permit.

It should further be pointed out that there are many farmers, even in the drought area, who had sufficient water to maintain a garden, if in earlier years they had provided the necessary shelter for vegetables and fruit trees. This omission can now be repaired in many cases and with the return of a period of greater precipitation it looks as if the time has arrived when trees should be planted more abundantly.

Full Operation Delayed

Shortage of equipment has held back full operation of Trans-Canada Air Lines, Hon. C. D. Howe, minister of transport, told the House of Commons. By Sept. 1 he hoped to see full operation of passenger, mail and express services between Vancouver, Toronto and Montreal.

South Africa may compel commercial travellers to pay for use of the roads.

It is thought that the Mississippi river valley once was a great interior sea.

Broadway, Ask for D. D. D. PRESCRIPTION.

Barbed Wire Wall

Fifty-Mile Fence To Be Built In Palestine

Nearly \$450,000 is to be spent in Palestine in constructing a barbed-wire wall along the frontier between Lebanon, Syria and Trans-Jordan impaling upon Palestine in the hope that Tegar's wall, named after Sir Charles Tegar, its prime advocate, may be effective in keeping smugglers, agitators, gun runners, terrorists and fugitives from justice from using the border zone as a base of operations.

A despatch to the London Times from Jerusalem says that specifications of the plan call for 50 miles of barbed-wire fence, varying in construction according to local conditions. The standard barrier apparently will consist of two parallel fences six feet high and five feet apart.

Each of the fences will have meshed wire at the bottom and barbed-wire above, and the space between the two fences will be crisscrossed with barbed-wire and filled with loose masses of wire. Where local conditions call for an even more formidable barrier than this there will be three parallel fences.—New York Sun.

Protect The Birds

Are Dependable Allies Of The Farmer In Destroying Insect Pests

Birds are the farmers' and gardeners' dependable allies in combating insect pests. Close observers testify that most birds eat insects and many eat practically nothing else. The thrushes, native sparrows, larks and wrens search the surface of the soil for their food. The woodpeckers give careful scrutiny to the bark and limbs of trees, digging into their cracks and openings to drag out burrowing larvae and hibernating insects. The flycatchers and warblers are to be seen sitting on high places ready to snap up the low-flying insects, while the nightingales and swallows find their living in the higher atmosphere.

The number of insects destroyed by birds is quite beyond calculation. Few birds are entirely beneficial but there are few indeed that are entirely harmful. Perhaps the worst of these are starlings, which are becoming exceedingly common in places, and the English sparrow. Both of these birds should be destroyed, for not only do they harm the crops but they chase away and destroy the native birds.

Treasure Hunt

New Attempt To Salvage Wreck Of Boat Which Sank 138 Years Ago

The first stage in the new attempt to salvage the treasure in the wreck of H.M.S. Lutine, which sank 138 years ago at the entrance to the Zuider Zee, has been accomplished. The largest dredger in the world, the Karimata, which has 131 acropods made of special steel, each of which cost \$100, has been towed from the building yard at Kinderdyk, near Rotterdam, to Terschelling.

Before the dredging begins the remains of the steel Becker Tower, which made an unsuccessful attempt last year, will have to be removed. Everything depends on a spell of favorable weather during the next two months.

Mr. Van den Broek, general manager of the Billiton Mining Company, said that the Lutine was lying on clay at a depth of about 50 feet, beneath the level of the sea-bed with about 40 feet of sand on top of her, which it is the first purpose of the dredger to remove. The sea at that point is about 1½ fathoms, which corresponds to the draught of the Karimata.—London Times.

Fame Has Passed

Canadians at London's Dominion Day dinner learned the small room in the shadow of Westminster Abbey where their country's constitution, the British North America Act, was finally drafted more than 70 years ago had become a billiard parlor.

Berries of poison ivy are smooth and green, later turning yellowish white.

For Your Preserving

Use It This Year

Wheat Market In Europe

Want To Accumulate Reserve Stocks In Event Of War

Foreign trade experts of the United States agriculture department said that unsettled political conditions in Europe might open new and larger markets for surplus American wheat during the next 12 months.

Prospects for larger sales in Europe were indicated, they said, by the recent decision of Great Britain and The Netherlands to accumulate reserve stocks of the grain in preparation for a possible outbreak of war. Foreign trade authorities said other European powers were known to be considering similar action.

The Netherlands has begun establishment of a system for maintaining at least two months' supply of wheat at all times. Grain importers and dealers would be held responsible for maintaining such stocks with subsidy assistance from the government. Little is known about the British plan.

Trade experts estimated that European wheat imports for consumption needs during the next year would be about 450,000,000 bushels or about 50,000,000 more than during the last 12 months. Reserve stocks were not included in the estimates.

The proportion of possible reserve purchases of wheat in America would depend largely on prices, officials said, pointing out that if American prices were above the world level, buyers might go elsewhere.

Official crop reports indicate that Canada and Argentina may produce 125,000,000 bushels more than last year. Trade experts said that amount probably would be sufficient to meet the most optimistic increase in world import requirements.

Must Develop North

Should Be Utilized To Hold It For The White Man

Canada must develop and utilize its northland to hold it for the white man, W. D. Albright, superintendent of the Dominion experimental farm at Beaverbridge, Alta., warned at the American Association for the Advancement of Science in annual convention.

Like Russia, Canada must look to the north and the United States will follow its progress with satisfaction, he said. "For a particular reason of the very proper concern of the United States must be interested in the Dominion's conquest of the north."

"In the modern surge of racial expansion, in the mad quest for economic self-sufficiency, in the race of armaments and in the unscrupulous scramble for a 'place in the sun,' which soon often to mean territorial expansion, it is to be supposed that the northern third of this continent can be held by the white man unless developed and utilized by him? What of Asia?"

SELECTED RECIPES

FRESH CHERRY JELL-O TARTS

½ cup sugar
1 quart fresh sour cherries, pitted
1 package Cherry Jell-O
1 cup hot water
1 cup cream, whipped
9 baked 3½-inch tart shells

Add sugar to cherries and let stand 10 minutes. Dissolve Jell-O in hot water. Pour over cherries. Chill until Jell-O begins to thicken. Fold 4 tablespoons thickened Jell-O into whipped cream. Chill. Place layer of whipped cream in bottom of each tart shell and chill about 10 minutes. Then the level of the sea-bed with about 40 feet of sand on top of her, which it is the first purpose of the dredger to remove. The sea at that point is about 1½ fathoms, which corresponds to the draught of the Karimata.—London Times.

MELON AND RASPBERRY SALAD

1 package Lemon Jell-O
1 pint hot water
1 cup cantaloupe or honeydew melon, cut in ½-inch balls
1 cup fresh raspberries

Dissolve Jell-O in hot water. Chill. When slightly thickened, fold in melon balls and raspberries. Turn into ring mold. Chill until firm. Unmold. Serves six.

For Sea Supremacy

Soviet Russia Plans To Surpass Britain In Naval Construction

Soviet Russia believes she can challenge Great Britain for supremacy in the quality of its naval construction, it became known with publication of a speech made at Leningrad by Mikhail Kalinin, President of the Supreme Soviet.

Addressing workers at the Ordzhonikidze naval construction plant at Leningrad, Kalinin declared: "I believe that at present our engineers, technicians, master workers and specialists should be able to accept the task of surpassing Great Britain in quality of naval construction. Hitherto no one has surpassed Great Britain in naval construction but we are going to surpass her."

Sold only in the red and yellow packages. Never sold in bulk.

The Spirit Of China

Was Shown In Gift Sent By Madame Chiang Kai-Shek

In June, 1917, a war year for the United States, the present Mme. Chiang Kai-Shek, as a daughter of the famous Chinese Soong family, was graduated from Wellesley College.

June 18, 1938, Mme. Chiang's classmates held their annual reunion on the shores of Lake Waban. But 1938 is a war year for China, and Mme. Chiang could not attend.

Instead she sent a gift of silver spoons, which were used at a reunion tea. While she sent a message that through her gift she would feel that she was sharing in the festivities, she added that the spoons are "to show that a spoon may be licked, but China can't."

Mme. Chiang's patriotism is characteristic of the new China which she and her generalissimo husband have helped to build, a new China which with old stoicism is doggedly defending itself in a war still undeclared. Her humor and love of subtle parable are likewise characteristic.

The western world should realize that these racial traits are not the least important of the weapons with which China fights an aggressor.—Detroit Free Press.

Two Generations Back

Queen Elizabeth's Grandfather On Mother's Side Was A Minister

From the rectory to the throne in two generations is the history of Queen Elizabeth's family, says W. L. Clarke, in the Windsor Star. Her Majesty's mother, the Countess of Strathmore and Kinghorne, who died recently, was the daughter of the late Rev. William Cavendish-Bentinck.

From the manse to the vice-regal post of Governor-General of Canada has been made in one generation by Lord Tweedsmuir, who is the son of Rev. John Buchan of Scotland.

The surest way to make a postage stamp stick is to put the wrong address on the envelope.

How The Language Grows

Words Coined By Inventors Soon Come Into General Use

The word "television" was coined by J. L. Baird in 1925 to describe apparatus for television and was registered by him as a trade mark. On account, however, of the general adoption of the word in the United States and elsewhere to denote any kind of television apparatus, Baird Television, Ltd., has decided to abandon its registration as a trade mark, so that in future there will be no restriction upon the use of the word in connection with television. "Television" may thus be used in future as freely as "telephone" and "telephone."

The word "teleglyph" was first applied by Chappe in France, in 1792, to his invention of the semaphore system of transmitting messages to a distance; and the word telephone was used by Sature in 1828 for a system of signaling by musical sounds. It was employed in 1844 to describe a powerful wind instrument to convey signals at sea during foggy weather. Philipp Reis, in 1861, called his ingenious instrument a telephone, so that he may be regarded as the inventor of the name of the modern instrument. Alexander Graham Bell adopted the word in 1876 for his "Electrical Speaking Telephone."—From Nature.

Applies For Patent

Inventor Has Built Machine For Dry-Cleaning Eggs

Applications for a patent on an egg dry-cleaning process for poultry farms has been made to the British Patent Office. In the latter fine sand is flung at high pressure against eggs from the blades of an electric fan. The friction is claimed to clean eggshells much more thoroughly than water does as well as to lessen the dangers of stannous.

Leather-bound books in constant use, the Government reports, last longer than those infrequently used. The reason: Salt helps preserve leather bindings and salt is present in the perspiration of human hands.

Standard QUALITY AT NEW LOW PRICES

FROM the day it was introduced, the Firestone Standard Tire has more than lived up to its name by setting a new high standard of tire value. Thousands of car owners in all parts of Canada enthusiastically endorse it as the greatest tire Firestone ever built to sell at low prices.

Firestone Standard Tires give you everything you need — long mileage, extra safety, carefree, dependable service and economy. See the nearest Firestone Dealer today. Take advantage of Firestone's new low prices and equip your car NOW.

WHAT HO!

—By—
RICHARD CONNELL
By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XV.—Continued

She scanned the gilt-and-mirrored room. There was a profusion of Americans, a rich variety of Americans there, but not the one American she sought.

Lady Rosa took a table on the balcony commanding a view of the room, ordered a glass of sherry, a superb bonnet, and a salad, and kept waiting. At a table below her a man emerged from the shadow of a wine card as big as a baby's blanket; and then she did see a familiar face, her father's. Opposite him was Mrs. Clara Martha Phelps, looking twice as patrician as the earl, and nearly as happy. Lady Rosa resisted the temptation to drop a lump of ice on her sire's pate. If they saw her they'd ask her to join them and she did not feel that she was good company just then.

A smacking sound made her turn. Behind her in a corner, alone at a table for four, a man was smacking his lips over a glass of Burgundy, and making ready to perform a major operation on a steak the size of a dictionary. The diner was rather steakhake himself, with a medium rare complexion, porthouse jaws, and a hamburger neck. On seeing Rosa he got up and bowed toward her, an avalanche of relief. Stopping at her table he said,

"Lady Rosa Bingley?"

"Yes."

"Punder's my name."

"Oh, yes, Mr. Punder. I remember you, of course."

"Where's that Yank?" Punder shot at her.

"I presume you mean Mr. Ernest Bingley."

"That's just who I mean."

"I don't know," Rosa said.

"Hah! You don't, hey? Done a bunk, has he?"

"He has left Bingley Castle, if that's what you mean, Mr. Punder; and I believe he is somewhere in London. I don't know where. I wish I did."

"So do I," said Punder. "If I lay my hands on that dirty, little beggar—"

"Mr. Bingley is neither dirty, little, nor a beggar," said Rosa, warmly.

"Hah! Ain't he?" said Punder.

"Quite the contrary."

"That's what you think, said Punder."

"It is."

"Well, you're wrong. He's a fake. He's an impostor. He's a nobody without a penny to his name," declared Punder.

"I'm afraid, Mr. Punder, your steak has gone straight to your head," said Rosa.

"Frah, has it?" said Punder. "Well, one of my men just phoned me from Paris. He had a talk with O. G. Wyncoop. Seems Wyncoop is hoping mad because he's classed as an undesirable alien on account of what his kid did here. Not—" threw in Mr. Punder parenthetically "that old Wyncoop isn't a robber himself."

"I fail to see how this applies to Mr. Ernest Bingley."

"Oh, you'll see," said Punder. "The net of it is that Bingley is no more a millionaire than that fish on your plate. He's just a country bumpkin that stuffs his pockets for a living in a village in Iowa, or Ohio, or Onchoo or some such place. But

he's a sly cove, and he sold up his shop to come over here and try out some of his cute games on us slow Britishers. Well, he took me in. To the tune of twenty thousand pounds—"

"Are you accusing Mr. Bingley of stealing?" asked Rosa, pale as the table-cloth.

"No. Not exactly," said Punder. "He broke no law, or I'd set Scotland Yard on him. It was a legitimate enough business deal, no shadier than many another. He caught me napping. Fooled Pete Tyler, too. Pete didn't lose anything, but I did. I don't mind the twenty thousand quid, of course; but I hate being stung. I got pride. And when I catch up with young Bunco Bingley he'll feel the weight of my beetle-ashers."

Mr. Punder brandished a size 12A shoe.

"Are you sure, Mr. Punder," said Rosa, quietly, "that Mr. Bingley has no money?"

"Of course he has," said Punder. "Didn't I just tell you he short-changed me out of twenty thousand?"

"I don't quite see why he made me hand over those notes instead of cash. Of course, by now, he's had them discounted, and has probably lit out for Paris."

"That's what you think," said Lady Rosa.

"Huh?"

"Mr. Punder," she said, "have you no idea at all where he might be?"

Punder began to wheeze with gusty laughter.

"What did the rascal do to you?" he asked.

"That's my affair, I think."

More laughter shook the portly Punder.

"Sorry, but I don't see the joke," said Rosa.

"Ho ho ho!" chuckled Punder. "That little knave doesn't miss a trick. Takes 'em all, high and low, in his stride. Well, as we're in the same boat, let's join forces."

"No, thank you."

"Well, I'll hunt you and you hunt him. If I find him first—"

"You'll grind his bones to make your bread, I suppose."

"Ho ho ho!" roared Punder. "That'll will. If you get on his track, just ring me up at my Park Lane house, will you?"

"Yes, if you'll notify me the minute you find him."

"It's a bargain."

"I'm staying with the Countess of Bathery in Onslow Square," Rosa told him. "And now, Mr. Punder, hadn't you better get back to your seat?"

"I expect so," said Punder. "Do you like hash?"

"Yes, why?"

"That's what I'm going to make out of E. Bingley," said Punder, and returned to his steak.

Lady Rosa was sipping her coffee when she heard a voice call out,

"Xoo hoo, Rosa, you hoo!"

Her father, on his way out of the restaurant, had spied her.

She waved her napkin at him.

"I'll come up," yelled the earl, to the surprise of the sedate diners.

Come up to the balcony he did, and Clara-Martha Phelps came with him.

"Rosa," he said, "meet your mother."

Mrs. Phelps giggled.

"I mean to say," went on the earl, "she's going to be in a few months."

"Bless you, my children," smiled Rosa.

"We're to be married in Vienna," said the earl, "just as soon as Clara-Martha finishes her psychoanalysis. Then he'll go for a honeymoon in Venice and back to Bingley Castle in time to water the tulip bulbs."

"I congratulate you both."

During an intermission at a party, some prominent business men were discussing an absent member. Few could find anything pleasant to say about the person in question. One guest, who had worked his way to success up the ladder of many mistakes and failures, said, "That reminds me of about 20 words I once memorized from Dr. Isaac Goldberg's 'Tin Pan Alley': 'Snobbery is but a point in time. Let us have patience with our inferiors, they are ourselves of yesterday!'"

"Yes, George-porgie," said Clara-Martha Phelps.

When they had gone, Rosa summoned her waiter.

"Please tell Max that Lady Rosa Bingley would like to see him for a moment," she said.

"Very good, m' lady."

Max presently approached her table. He had the air and profile of an emperor entering Rome in a triumphal chariot. Max spoke nine languages, and knew enough about the British nobility, it was said, to make a fortune by blackmail, if he were so inclined. He wasn't. He preferred to be the major domo at Nero's. Besides, he had a fortune.

"Good evening, my lady," he said. "May I offer you my felicitations?"

"On what, Max?"

Once you sweeten your morning cereal with BEE HIVE Syrup you'll know how good cereal can taste.

TRY IT TOMORROW

"On the successful culmination of his lordship's romance."

"Max, you know everything," laughed Rosa.

"I regret I do not know where you can find Mr. Ernest Bingley," Max said.

"How do you know I want to find him?"

"A little bird—"

"Meaning my father?"

"Yes."

"Max, let me pose a question."

"Please do, my lady."

"Suppose you were in London—"

"I am."

"And broken—"

"What would you do? Where would you go?"

"Meaning me, or a hypothetical character?"

"Meaning a young American."

Max gave thought to the matter, as if he were Tiberius considering a matter of state.

"He is without funds?" he queried.

"Practically. Nothing but a return ticket to the States, I think."

"What I did," said Max, "when I first came to London as a young man, and a very poor young man, was to sit on a bench on the Thames Embankment and plan how to become a rich one. On the benches there, my lady, one finds many who were rich, and some who are going to be."

"I'll try there," said Rosa, getting up.

"Surely not alone?"

"Yes."

"It is a vile night."

"No matter. Thank you, Max."

"Always at your service, my lady."

Rosa paid her bill and stepped out into the fog.

(To Be Continued)

No Insects Allowed

Trans-Atlantic Airlines To Have Sprinkling System For Pests

Bugs will not be permitted to hitch-hike on the trans-Atlantic airlines, the United States Commerce Department said. A report from the American commercial attaché at London said that Imperial Airways has developed an insecticide sprinkling system designed to rid aircraft of all insects pests. Imperial Airways and Pan American Airways are to inaugurate joint service between Great Britain and the United States this fall.

Ourselves Of Yesterday

During an intermission at a party, some prominent business men were discussing an absent member. Few could find anything pleasant to say about the person in question. One guest, who had worked his way to success up the ladder of many mistakes and failures, said, "That reminds me of about 20 words I once memorized from Dr. Isaac Goldberg's 'Tin Pan Alley': 'Snobbery is but a point in time. Let us have patience with our inferiors, they are ourselves of yesterday!'"

"Yes, George-porgie," said Clara-Martha Phelps.

When they had gone, Rosa summoned her waiter.

"Please tell Max that Lady Rosa Bingley would like to see him for a moment," she said.

"Very good, m' lady."

Max presently approached her table. He had the air and profile of an emperor entering Rome in a triumphal chariot. Max spoke nine languages, and knew enough about the British nobility, it was said, to make a fortune by blackmail, if he were so inclined. He wasn't. He preferred to be the major domo at Nero's. Besides, he had a fortune.

"Good evening, my lady," he said. "May I offer you my felicitations?"

"On what, Max?"

Must Choose Your Own

No Standard Diet For Arthritis According To Specialist

When a well known doctor, one moreover who specializes on the subject, says that "red" meat won't hurt you if you are rheumatically inclined, that's news. Dr. Douglas Taylor's pronouncement to that effect, made just before setting out to attend a convention in Halifax at which rheumatism was expertly discussed, should set the heather on fire with a vengeance.

For we have always been taught, generation after generation of us, that meat was bad for rheumatic subjects, and red meat something worse than merely bad. Every one that way inclined, from the first creaky twinges to the stage of gnarled and burning joints, has been told by the family physician or the specialist-expert to cut from his diet certain things, chief among them red meats of every kind.

And now along comes Dr. Taylor and blows that venerable belief sky-high. There is, it appears, no such thing as a standard diet for arthritis. You work out your own salvation by fitting your diet into your own brand of rheumatism.—Montreal Star.

Must Be Acquired

Good Taste Grows From Effort To Appreciate The Best

C. E. M. Joad, in Scribner's, states good taste is not instinctive, but acquired. All native tastes are bad. The taste of the young in music is abominable, in literature execrable. Good taste grows slowly through the effort to understand what is beyond us, the endeavor to appreciate what we cannot yet understand. It depends on our willingness to be bored with what is good in order that we may become bored with what is bad and so demand something better. In short, it is born of faith, the faith that the kingdom of beauty can neither be purchased by dollars nor taken by storm, but must be approached by a process of trial and error, a willingness to learn, and the humility which is prepared to accept on faith and the judgment of others what it cannot yet dare to reject on its own.

Provided New Words

Several Things Have Been Named After English Peers

According to So You're Going Magazine those amiable Englishmen who write to the newspapers have discovered a new one this year: Namely, what English peers have had their names turned into new words in the language? One begins, of course, with the Earl of Sandwich, who wouldn't leave the gaming table, ordered some meat between bread slices brought in, and achieved an unexpected fame thereby.

But there are apparently quite a lot of others, including the seventh Earl of Cardigan, who got a sweeter name after him, the Duke of Wellington, who ended up as a pair of boots and a cooking apple, and a certain Crimean war general named Raglan, who turned out to be an overcoat.

The Streamlined Potato

Will Have No Deep Eyes And Be Easier To Peel

The work of the professional plant breeder is not designed to aid the farmer alone. "Streamlining" of cars has been followed by the idea of the streamlined potato. Such a variety is one of the chief goals of potato specialists everywhere.

This streamlining is the elimination of deep eyes that cause such waste during peeling. Besides being more economical, the newer shallow-eyed varieties may be peeled with greater speed.

Like the streamlining of cars, the elimination of deep eyes in potatoes is a gradual process. Our latest varieties are improvements, but still shallower eyes may be expected in later models.—Scientific American.

Underground Post Office

South Australian Opal Field Has Only One In World

Coober Pedy, the "remote" South Australian opal field, possesses the only underground post office in the world. The prospectors live in "rooms" dug into the soft earth of the low sandstone hills. Here, too, is their bank and their post office. Coober Pedy is the aboriginal name for white man's burrow.

Mechanized Viewpoint

Modern transport, press and film are creating in England what Earl Baldwin describes as a "standardized suburban mind." We already have too much of that here, states the Farmer's Advocate. Rural people accept all too placidly the urban viewpoint, and wholesome rural independence is becoming inarticulate.

FOR ANY TYPE OF HOUSE

For inexpensive homes or elaborate mansions, architects and contractors are recommending GYPROC FIRE PROOF WALL BOARD for interior walls and ceilings. Owners recognize the many advantages of using GYPROC. It is Fire-proof—will not burn. It will not crack, warp or sag. It provides a smooth, seamless surface—perfect for any decoration. It speeds up building—is economical. It costs no more than other and inferior materials. G68

Might Reverse Decision

Question Whether Judge Would Apply Case To Himself

A recent legal decision in the United States has fallen upon jaded sports writers like manna from heaven. It appears that the umpire at a ball game in a West Virginia town called a strike. The batter felt differently about it, made a verbal protest and followed it up with a punch on the nose. The umpire took the case to court.

After hearing the testimony, the judge dismissed the case with the remark, "It is the inalienable right of a baseball player to get mad and have a fight with the umpire."

The judge has had his little day, but we are wondering what his reaction would be if some litigant in his court exercised his inalienable right to get mad at a decision and took a punch at the judge himself. Perhaps it might occur to the umpire's league to make a test case.—Winnipeg Tribune.

Our Pioneer Forefathers

Could Tell Youth Of To-day That Life Is Never Easy

Our young people to-day, if they possess anything of the spirit of their pioneering forefathers, will not feel too far themselves in what they may think to be their plight, says the Ottawa Journal. Their lot may seem hard, but it is not as hard as was the lot of their fathers, most of whom never knew the education nor the care nor the comforts which go to so many young people to-day. Let them remember that life, at best, isn't easy; that it is an endless adventure, a hard and long battle with unavoidable reverses. To ask the place without the dust is to ask too much.

A psychologist says it is "boner" school children write "boners," since words in English have so many definitions; for example, game has 15 meanings, grain has 30 fall has 29 and account has 34.

It is reported that a light sprinkle of rain makes the average road one-third more slippery than a drizzling rain.

First American fighting ships were ordinary merchantmen, with space cleared for guns.

Marooned

There is one visitor to Calgary who is sorry he went there for the stampede.

He is Leonard Gauthier, of Huxley and he has reason enough for his lack of enthusiasm. Last night a thief slipped into Mr. Gauthier's room in a local hotel and from his trousers removed \$30 in cash and his return ticket home

Want Drouth Area Farmers on Board

Hanna (Special) — Resolution asking the provincial government to give representation to farmers from the drouth area on the Special Aras Board, and asking for immediate development of such modifications of the Peace Water Diversion scheme as are applicable to Alberta, were among the resolutions passed by the Hanna local U. F. A. last Saturday.

William Mowat, who attended the annual convention of the association, was the principal speaker. Discussion took place in regard to the proposed Production Tax Act, but as the act is now before the Alberta Supreme Court, no action was taken with regard to it.

Mr. and Mrs. Carl Rosenau left for Forestburg this week where they will spend a month visiting their daughter, Mrs. Vanderburg.

SEARLE PRECIPITATION REPORT NO. 6.

(Compiled from 182 Rain Gauge Reports)

Taking into account the precipitation that occurred last autumn during the months of August, September and October, and the rains which have fallen this year from April 1st to July 1st, inclusive, and weighting for wheat acreage, the records reveal that the moisture situation for the three Prairie Provinces, as a unit, on July 1st, was 86 per cent of normal as compared with 90 per cent three weeks ago and 65 per cent for July 2nd a year ago.

The moisture condition for Alberta on July 1st was 90 per cent of normal as compared with 74 per cent at the same time last year.

For Saskatchewan, on July 1st, the condition was 85 per cent of normal as compared with 51 per cent last year.

For Manitoba, on July 1st, it was 79 per cent as compared with 105 per cent last year.

Since July 1st, the date upon which this compilation was made, unusually heavy rains have fallen over large areas in the West. The actual condition, therefore, at this moment over the whole West, is probably now nearer to 90 per cent than the 86 per cent indicated in this report.

Tree Planting

Car Gives Advice On Shelter Belts

Funds for tour of Forestry
Car provided by line
Elevator Companies

Reducing loss of moisture from evaporation, damage from soil drifting, conservation of natural trees and planting shelter belts; beautifying the farm and grounds are objects of the Canadian Forestry Association's Travelling Tree Planting car. This railway coach equipped with motion pictures and lantern slide machines, is touring the province for the thirteenth year. This year the car is being financed by the member line elevator companies of the North West Grain Dealers' Association. Local line elevator agents are sponsors of the car where it makes a stop. The car was donated to the Canadian Forestry Association by the Canadian Pacific Railway and both railways move it from town to town free of charge.

According to A. B. Baven of the Association, who is travelling with the car for his twelfth year, there is greater interest and enthusiasm shown by the rural people than ever before. The car has been out since early March. At the end of May 48 towns had been visited, 128 meetings held, with a total attendance of 17,652 people.

Every afternoon a special program is shown for the school children, and in the evening for adults. A well rounded out program for the school pupils includes several short educational talking movies, with a couple of short comedies. Mr. Baven's talk on tree planting and planning the farm home grounds is accompanied with movies and lantern slides. The evening program includes many of the same pictures shown in the afternoon, but more time is spent on the main subject. Those attending are invited to remain after the show to ask any questions concerning tree planting or other related subjects.

It is naturally impossible for the car to visit all prairie towns in one season. However all those interested may obtain advice from any line elevator agent concerning the car.

Mr. and Mrs. A. Rosenau left for Forestburg this week, where they will visit at the home of Mr. and Mrs. Vanderburg.

Miss K. Proudfoot left on Saturday for Rainier where she will visit at the home of Miss G. Massey.

RELAXATION

There is no need to look beyond that easy chair in your own home for complete RELAXATION and rest when you have a bottle of ALBERTA BEER in the offing... a splendid pick-me-up, smooth, tasty and refreshing; And no matter what brand of Alberta Beer you choose, each is distinguished by an individual merit that never fails to win the praise and loyal respect of all who know and appreciate GOOD BEER.

Engineering Marvels at Vancouver

The Empress of Japan, Queen of the Pacific, passing under the splendid new bridge now under construction across the First Narrows, the entrance to Vancouver's jam-packed harbor. The mainmast of the vessel is 195 feet above the load line, the bridge being 200 feet above high Spring tides.

The Canadian Pacific liner Empress of Japan, in addition to holding all the speed records on her Canada, Hawaii, Orient run is the largest ship entering Vancouver Harbor. The illustration clearly shows the magnitude and the beauty of both ship and bridge.
